DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 16, 2007 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Douglas Wathen on February 27, 2007.

The application has been amended as follows:

In the claim:

Claim 14 has been replaced with the following:

14. A detection system for detecting whether objects or body parts are obstructing a motor driven device, the system comprising:

a plurality of sensors, each sensor including;

a generally flat and film-like support;

a ~~multitude~~ multitude of electrodes arranged on one side of the support;

and

a means to measure a capacitance or a capacitance change;

wherein ambient air represents the ~~dielectric~~ dielectric;

a control in communication with the plurality of sensors, the control indicating a change in ambient conditions when all of the plurality of sensors measure a capacitance change and the control indicating an obstruction situation when less than all of the plurality of sensors measure a capacitance change; and

wherein each of the capacitive plurality of sensors can be deformed in all directions for installation.

Allowable Subject Matter

3. Claims 2, 5-10 and 13-14 are allowed.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

Claims 2, 5-10 and 13-14 are allowable because none of the prior art discloses or fairly suggests a detection system comprising a plurality of sensors, each sensor including a multitude of electrodes arranged on one side of a generally flat and film-like

support; a control indicating a change in ambient conditions when all the plurality of sensors measure a capacitance change and indicating an obstruction situation when less than all the plurality of sensors measure a capacitance change; wherein each of the plurality of sensors can be deformed in all direction for installation, and in the combination as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
